

Naser Baradaran

Frontend Engineer | React • Next.js • TypeScript • Full-Stack

Abstatt, Deutschland | +49 176 21714568 | naser.baradaran33@gmail.com |

[Portfolio](https://modern-pixel-nine.vercel.app/) : <https://modern-pixel-nine.vercel.app/> | [GitHub](https://github.com/naser-baradaran33): <https://github.com/naser-baradaran33>**PROFIL**

Frontend Engineer with strong Full-Stack experience in React, Next.js and TypeScript, specializing in AI-powered web applications, event-driven architectures, and production-ready SaaS platforms. Continuously building and shipping since 2022 — in parallel with professional IT work — with proven ability to design and deliver complex systems end-to-end, including real-time data integration, agent-based workflows, and browser-based IDE environments. Bachelor's degree in Information Technology, officially recognized in Germany as equivalent (Anabin H+).

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, ShadCN UI, CodeMirror 6
- **Backend & Realtime:** Convex, Firebase, MongoDB, REST APIs, Next.js API Routes, WebContainer API
- **KI & Agent-Systeme:** Inngest, Agent Kit, Gemini AI, Vapi AI, Finnhub API, Resend
- **Authentication & Integrations & Tools:** Clerk, BetterAuth, Sentry, GitHub API (Octokit), Zod, React Hook Form, Redux Toolkit, Zustand
- **Deployment & Workflow:** Git, GitHub, Vercel, CI/CD, Responsive Design, Performance-Optimierung

PROFESSIONAL EXPERIENCE

IT Support & Softwareentwicklung (parallel)

2022– present

Clean Pur Gebäudereinigung GmbH, Deutschland—IT Support | Personal Projects—Software Development

- Continuously building production-ready Full-Stack projects since 2022, alongside professional employment
- Developed internal automation scripts and tools to streamline IT support workflows and reduce manual processes
- Technical support for software, hardware, and internal systems; onboarding and training of new staff

Freelance Frontend Developer

Self-employed

2022 – present

- Designed, developed, and deployed responsive web applications with React and Next.js for multiple clients
- Independent project management from requirements gathering to production deployment, with focus on performance and mobile experience

PROJECTS

FlowCode-AI — AI-Powered Browser-IDE 2026

Full-Stack – Next.js, React, TypeScript, Convex, Inngest, Agent Kit, WebContainer API, CodeMirror 6, Clerk, Sentry

Live-Demo: flow-code-ai-rxe4.vercel.app

- Built a full browser-based IDE: code editor (CodeMirror 6), file tree, live preview, and integrated terminal (xterm)
- Implemented an agent-based code engine with tool-oriented file processing and event-driven backend via Inngest
- Real-time data sync via Convex; live project execution via WebContainer API
- GitHub import/export via Octokit; authentication with Clerk; error monitoring with Sentry

Real-Time Stock Market Insights Platform

Full-Stack SaaS-Anwendung — Next.js 14, TypeScript, Tailwind CSS, ShadCN UI, MongoDB, BetterAuth, Finnhub API, Gemini AI, Inngest, Resend

Live-Demo: viewsignal.space

- Real-time finance platform with live market data, authenticated dashboards, background jobs, and automated email alerts

AI-Powered Interview Preparation Platform 2024

Full-Stack SaaS—Next.js, TypeScript, Firebase, Tailwind CSS, Gemini AI, Vapi, Zod

Live-Demo: interview-platform-4obb.vercel.app

- Interview platform with AI-generated questions, voice-based interaction (Vapi AI), and secure authentication

EDUCATION

Bachelor of Engineering, Information Technology

07/2014 – 08/2018

Islamic Azad University, Iran

- GPA: 17/20 (≈ German grade 1,3)
- Recognized in Germany: Anabin H+ (fully equivalent to German Bachelor's)

LANGUAGES

Persian — Native | German — C1 | English — B1
